

TAXA OMITTED FROM "UNIONACEA" BY FRITZ HAAS, 1969

Richard I. Johnson

While searching for the type species of *Arotonaias* Martens 1900, Kabat and Boss (1997: 104) noted that this generic name was not included in the monumental compendium on the Unionacea by Haas (1969) which was meant to be complete to that date. Haas based his classification of the North and Central American species mostly on the work of Frierson (1927), which was then the latest synthesis. He inadvertently skipped over *Arotonaias*, which had appeared on the top of page 92, and missed the three species listed under it, and, of course, its type species, *Unio cyrenoides* Philippi 1847, selected by subsequent designation (Frierson, 1927: 11). The missing taxa, with their synonyms, which were also omitted, are listed below.

Arotonaias cyrenoides (Philippi, 1847)*Unio cyrenoides* Philippi.*Unio sagrinatus* Sowerby, 1868.*Unio newcombianus* Lea, 1856.*Unio gabbianus* Martens (non Lea) 1900, p. 498 pl. 39, figs. 5, 5a, 5b*Arotonaias imbricata* (Morch, 1860)*Unio imbricatus* Morch.*Unio encarpus* Lea, 1868.*Arotonaias gabbiana* (Lea, 1868)*Unio gabbianus* Lea.*Unio nicaraguaensis* Lea, 1868.
